

# S-PECS Series

## S-PECS Series Distinctive hourglass shape fits the hand

This distinctive bottle features a rounded hourglass form. The image presented by the bottles changes depending on the angle of view.

This new series can be used in conjunction with the existing ECS Series in PE material to develop a full line of products.

# S-PECS Series — Distinctive hourglass shape fits the hand —

\* Material : PET / \* Molding method : injection stretch blow molding

## ■ Easy to hold, easy to carry design

Rounded hourglass form makes the bottles easy to handle even for those with smaller hands. Especially suitable for women's and baby care products.

The hourglass shape also makes products easy to pick up and carry when sold in retail settings.

## ECS Series

A series in HPDE material featuring the same shape in capacities from 30 to 200 ml is also available. With the range of materials and capacities on offer, you can select the ideal size and material to match the product concept and formula.

Capacities : 30ml, 50ml, 60ml, 80ml, 100ml, 150ml, 200ml

## Custom bottle development with Takemoto

With injection blow molding and the use of one of our existing preforms, you can create an original PET container in your desired design with only the development of a blow mold required. As the blow mold is the only investment needed, initial development costs can be reduced.
